IDENTIFIERS	*Corporate Support; Survey of Voluntary Support of Education

ABSTRACT

Results of the 1980-1981 Survey of Voluntary Support of Education are presented, including a narrative summary and detailed statistical tables. Reports of voluntary support are presented for 928 institutions, and support patterns over the last decade are examined, along with patterns for a core group participating in two successive surveys. Attention is also directed to national estimates of voluntary support for higher education by source and purpose, and to economic indicators and institutional expenditures. Statistics on support are presented for specific colleges and universities and private elementary and secondary schools by state. For each institution, support in dollars is indicated for: current operations; capital purposes; six sources of support (e.g., business, alumni, foundations); bequests; annuities, life contracts, insurance; six kinds of support through the annual fund; nonalumni parent support; corporation matching gifts; and endowment market value. Summary tables of this information are also presented by type of institutions. National estimates of voluntary support of higher education indicate that: total voluntary support rose $430 million in 1980-1981 to an estimated $4.23 billion; and alumni and nonalumni individuals as groups each contributed more than $1 billion in a single year. Reports for participating institutions show that: bequests and deferred gifts declined in importance as sources of gifts from individuals; and corporate matching gifts provided a record 8 percent of total corporate support. Highlights

Higher Education

National Estimates of Voluntary Support of Higher Education indicate that

- Total voluntary support rose $430 million in 1980-81 to an estimated $4.23 billion
- Alumni and nonalumni individuals as groups each contributed more than $1 billion in a single year
- Business corporations again increased their share to a new record of 18.4 percent
- Funds for faculty compensation increased by 23.4 percent

Reports from Participating Institutions show that

- Total support of the 789 core institutions in two surveys increased by 11.4 percent. Gifts from individuals and corporations outpaced inflation. Support for faculty compensation was up by 20.7 percent
- Bequests and deferred gifts again declined in importance as sources of gifts from individuals
- Corporate matching gifts provided a record 8 percent of total corporate support
- The average alumni gift to the annual fund decreased 1.1 percent to $98.15, but solicitation effectiveness reached a record 18.6 percent

Private Secondary and Elementary Schools

Voluntary Support of Independent Schools increased faster than inflation

- Support for the 292 schools reporting in both 1979-80 and 1980-81 rose by 16.9 percent
- Alumni and foundations increased their contributions by above-average percentages
- Support for faculty compensation increased by 52 percent. Unrestricted funds were up by 20.4 percent

Additional copies at $15.00 per copy prepaid are available from the Council for Financial Aid to Education, 680 Fifth Avenue, N.Y., N.Y. 10019

HE 015 680

The Survey Report was prepared by the CFAE Division of Research. May 1982.

A grant from the Reader's Digest Foundation assisted CFAE in meeting the costs of producing this survey.

Preface

This twenty-second *Survey of Voluntary Support of Education* has been jointly sponsored by the Council for Financial Aid to Education, the Council for Advancement and Support of Education and the National Association of Independent Schools, with the cooperation of several other national organizations. It is the latest in a series of studies of educational philanthropy dating from 1954-55.

The definitions used in the 1980-81 survey are as defined in *Gift Reporting Standards for the CASE-CFAE-NAIS Survey of Voluntary Support of Education, 1981*, and are essentially those used in prior years. Voluntary support excludes income from endowment and other invested funds as well as all support received from federal, state and local governments and their agencies; in editing the survey questionnaires, CFAE deleted all income from these sources when so identified by the reporting institution. Any enrollment figures not supplied by the colleges and universities were taken from the *Education Directory, 1980-81*, published by the National Center for Education Statistics, U.S. Department of Education.

Since 1965-66, the survey information has been processed by electronic computer, and most of the data supplied by the participating institutions have been stored on magnetic tape. The ready availability of this store of information makes it possible to undertake supplementary studies of educational philanthropy.

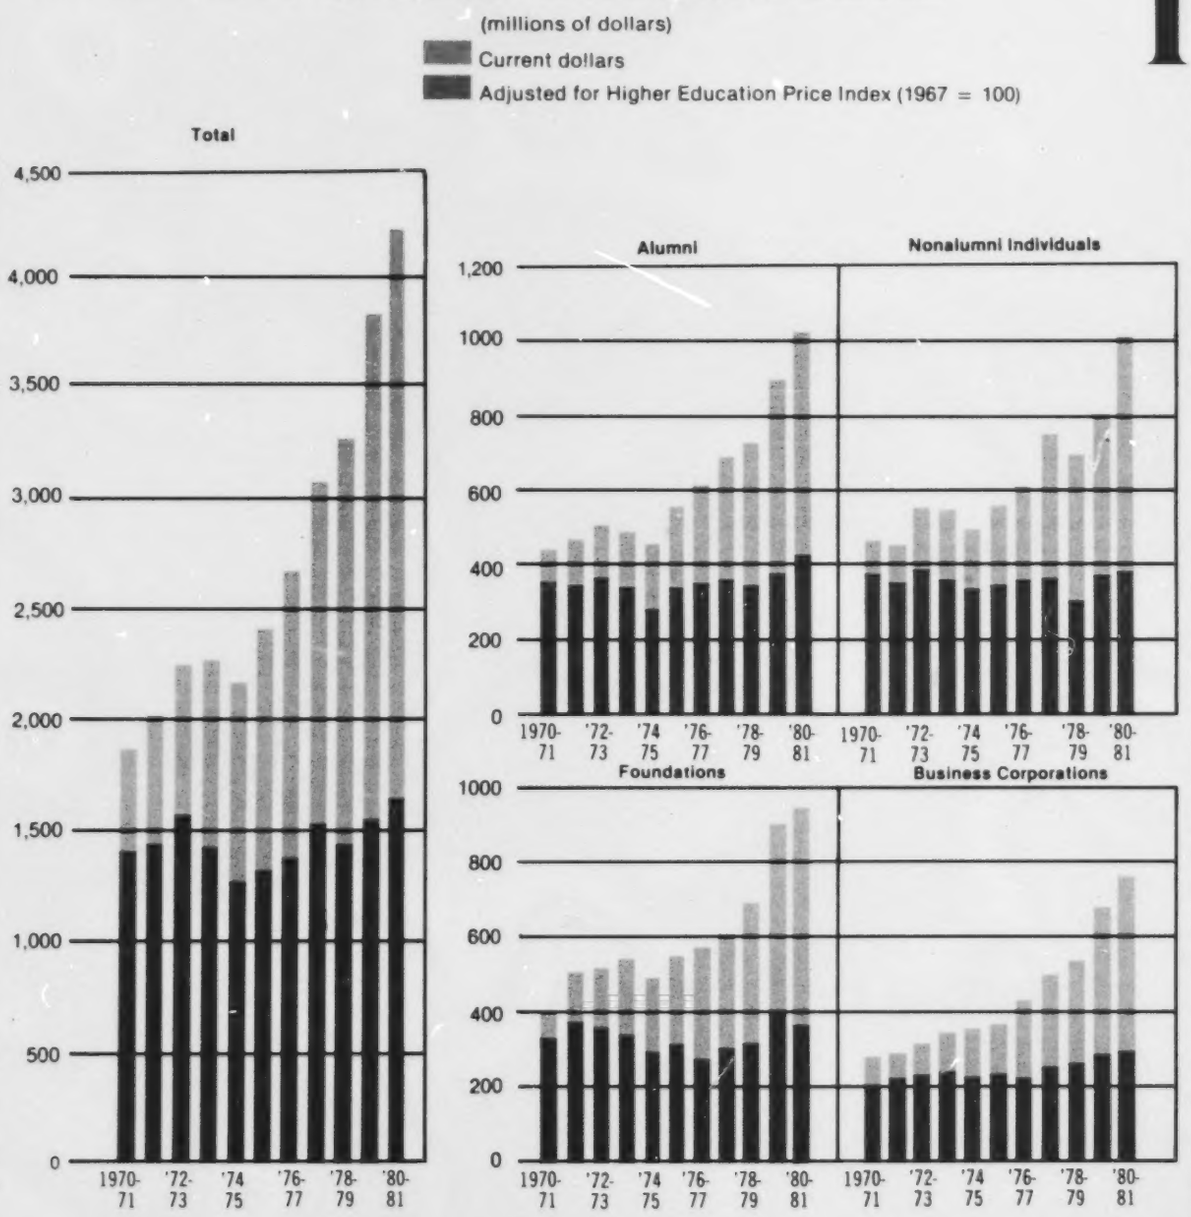
Back issues of the printed reports for the years since 1971-72 are available from the Council for Financial Aid to Education. The reports for all survey years prior to 1971-72 are now available on microfiche in complete sets and may be obtained from the Council for Advancement and Support of Education.

The following table summarizes participation in 1980-81.

	Four-Year Colleges and Universities	Two-Year Colleges	Private Precollege Schools	Total
Invited to participate	1,598	623	834	3,055
Completed and tabulated questionnaires	864	64	378	1,306
Not tabulated:				
Unable to participate	2	1	2	5
No support	1	15	1	17
Reporting too late or in totals only	29	2	2	33
Total response	896	82	383	1,361
Response rate	56%	13%	46%	44%
Total amount tabulated	$3,296,651,745	$21,412,824	$211,960,362	$3,530,024,931
Too late or in total only	$ 94,828,460	$ 516,772	$ 647,240	$ 95,992,472
Total amount reported	$3,391,480,205	$21,929,596	$212,607,602	$3,626,017,403

To all those who filled out the questionnaires, to the institutions they represent, and to the cooperating associations in the educational community, CASE, CFAE and NAIS express their gratitude.

Chart 1. Estimated Voluntary Support of Colleges and Universities by Major Sources and in Total



I National Estimates

- Total voluntary support rose $430 million in 1980-81 to an estimated $4.23 billion
- Alumni and nonalumni individuals as groups each contributed more than $1 billion in a single year
- Business corporations again increased their share to a new record of 18.4 percent
- Funds for faculty compensation increased by 23.4 percent

Total voluntary support for institutions of higher education reached an estimated $4.23 billion in 1980-81. This was a $430 million increase – or 11.3 percent – over the $3.8 billion estimated in 1979-80, not quite enough to keep up with inflation of 11.8 percent during the same period, as measured by the Consumer Price Index (CPI). It did, however, exceed the 9.8 percent growth in the cost of goods and services purchased by colleges and universities, as measured by the Higher Education Price Index (HEPI) (see **Chart 1**). In terms of real purchasing power for the higher education dollar, therefore, voluntary support increased slightly over 1 percent between 1979-80 and 1980-81 and almost 19 percent in the five years since 1975-76.

By Source

There were wide variations in the patterns of change for the various donor groups, as can be seen in **Table 1**. The greatest increases were registered by individuals – both alumni and nonalumni individuals – and by "other" sources, a collection of fund-raising consortia, associations and organized activities. The rate of growth in corporate donations slowed, from 25.2 percent to 11.8 percent, but was still a bit higher than the rise in total support, even though corporate profits declined by 5 percent. Foundation support, which experienced an extraordinary rise in 1979-80 because of

the transfer of $105 million from the Emily and Ernest Woodruff Fund to Emory University, expanded only minimally in 1980-81. If this transfer is not considered in the 1979-80 total, however, the growth would have been 15.5 percent, more nearly in line with the increases from the other major donor groups. Contributions from religious denominations was the only category exhibiting a decline in 1980-81. This is the second year in which support from these donors has declined and follows a long period of erratic and relatively slow expansion in their contributions.

Over the five-year period from 1975-76 the greatest growth was experienced in corporation support, both in current dollars and in constant dollars as adjusted for HEPI. Support from individuals, foundations and other sources all grew at about the same rates, and all bettered inflation. Contributions from religious denominations actually declined in real terms.

By Purpose

Contributions varied widely by the purposes for which they were made, but no purpose received less money in 1980-81 than in 1979-80. Unrestricted gifts, which over the years have represented the largest share of private support, grew hardly at all in 1980-81, due largely to the fact that the Woodruff grant to Emory University in 1979-80 created an unusually large base from which to measure the year-to-year change. The largest increases were seen in faculty compensation and "other." A survey of college presidents by CFAE in 1981 found that they considered faculty salaries the number-one priority for increased support. This concern may have been responsible for some of the rise.

These year-to-year changes are similar to the change patterns between 1975-76 and 1980-81, both in current dollars and in adjusted dollars.

Funds for current operations grew faster than did those for capital purposes between 1979-80 and 1980-81 and also outpaced inflation. The large increase in capital funds in 1979-80 from the Woodruff transfer was partially responsible for the fact that the rise in 1980-81 was small. In adjusted dollars the five-year growth patterns for both current operations and capital purposes have been almost identical.

*Includes nonrecurring transfer of $105 million from the Emily and Ernest Woodruff Fund, Inc., to Emory University for unrestricted endowment.

Long-Term Perspectives

Levels of voluntary support are closely related to several economic factors which affect both the capacity and motivation to give, especially of the principal donors to colleges and universities. Inflation affects all donor groups, although in ways that are not yet fully understood. The ability and desire of individuals to make donations are related both to levels of disposable personal income and to tax laws and regulations. Corporate contributions are affected by profits, although the relationship is imperfect. Current contributions budgets, for example, are often linked to profits in previous years because of the time involved in the decision-making process. Corporate foundations are responsible for an unknown portion of corporate support, and the levels of their giving may be tied as much to returns on foundation investments as to their sponsors' profits. The level of general foundation grants is related to the income they receive from invested assets as well as to tax regulations concerning payouts.

Economic Indicators

Several developments in the economy between 1975-76 and 1980-81 were of significance to voluntary support. The Consumer Price Index, a common measure of inflation, rose 56 percent over the five years, and the yearly increases reached double-digit levels in the last two years of the period. The other pertinent economic

measures rose at even faster rates. Disposable personal income grew by 67.4 percent, corporate profits went up 59 percent, and dividend and interest income more than doubled in concert with a 70 percent rise in the gross national product.

During this same period voluntary support rose almost 76 percent. Support from the three principal donor groups all rose faster than inflation, but not necessarily in tandem with the factors associated with each. Gifts from individuals exclusive of bequests and deferred gifts, for example, increased faster than did disposable personal income. On the other hand, dividend and interest income rose considerably faster than did foundation grants, and corporate support grew almost twice as fast as did corporate pretax net income.

When the economic indicators and giving patterns are adjusted for inflation, the patterns become more exaggerated. In 1967 dollars individual gifts increased 30 percent between 1975-76 and 1980-81, almost four times the 7 percent growth in disposable personal income. Corporate grants rose 32 percent, despite only a 2 percent expansion in pretax net income. Foundation support rose about 7 percent in the face of a 35 percent rise in dividends and interest income. Total voluntary support rose 12 percent in real terms versus an almost 9 percent growth in the gross national product.

In the five-year period from 1975-76, therefore, all of the major donor groups increased their support of colleges and universities in both current and inflation-adjusted dollars. Gifts from individuals and corporations rose faster than the indicators generally associated with their income resources, while foundation support lagged behind income from dividends and interest.

How these patterns will be affected by the Economic Recovery Tax Act of 1981 cannot be predicted at this point, but it will undoubtedly have an impact. The nature of the effects, however, will not surface until the survey of 1982-83, the first full academic year in which its provisions will be in place.

Table 2. Voluntary Support in Relation to Enrollment, Inflation, and Institutional Expenditures

Year	Total Enrollment (thousands)	Price Indices (1967 = 100) CPI	HEPI	Institutional Expenditures Total (billions)	Per Student (Current)	Per Student (CPI)	Estimated Voluntary Support Total (Millions)	Per Student (Current)	Per Student (CPI)	As % of Institutional Expenditures

1975-76 to 1980-81	1.4	9.4	8.1	9.8	8.3	−1.0	11.9	10.4	1.7	

Institutional Expenditures

Although voluntary support is of continuing concern to institutions of higher education, the economic health of the system is more directly affected by changes in enrollment and their consequent impact on institutional expenditures. As can be seen in **Table 2**, institutional expenditures rose in double-digit percentages during the 1950s and 1960s. The rate of growth slowed somewhat in the first half of the 1970s, but has picked up slightly in the last half. Much of this rise since 1975-76 has been driven by inflation, for enrollment growth slowed considerably. Confirmation of the push from inflation is seen in the patterns of expenditures per student. Although they rose in current dollars, especially during the last half of the decade when enrollment slowed, they declined in real terms. These trends are of particular concern as colleges and universities press to maintain both diversity and quality in a period of probable retrenchment.

Voluntary support has contributed varying shares to institutional budgets over the years. During the second half of the 1960s and the first half of the 1970s, growth in voluntary support lagged behind growth in expenditures, and thus its per-student contribution declined steadily. Since 1975-76, however, the picture has brightened considerably. The percentage of institutional budgets met by voluntary support has increased, although not to the levels seen before the 1970s. Even more importantly, its per-student contribution increased in both current and adjusted dollars.

The future is likely to see greater than usual uncertainties and pressures on institutional budgets. The federal cuts in student aid funds, both those already in place and those that are proposed, have the potential for cutting enrollment severely and will compound the drop in enrollment probable from the decline in college-age youth. Many students may have to forego college completely or turn from the higher-cost private institutions to lower-tuition state and local colleges. But many states — hit by the recession in major industries — have already imposed budget cuts on their colleges and are not likely to react favorably to requests for increased appropriations. Cuts in other federal programs will further restrict the funds available to colleges to cover basic costs, at a time when continued inflation will raise costs and also eat into the value of endowments. Efforts to raise additional private support may meet with increased competition for these funds from other charitable organizations reacting to the same kinds of pressures. Institutions of higher education will therefore have to present their case even more effectively than they have done in the past if they are to get the help they need to maintain financial health and educational quality. If the past is any measure, this will be a difficult but not impossible task.

II Survey Results

- The 928 institutions reporting in 1980-81 received $3.32 billion in total support, an average of $3.576 million per institution
- Total support of the 789 core institutions in two surveys increased by 11.4 percent. Gifts from individuals and corporations outpaced inflation. Support for faculty compensation was up by 20.7 percent
- Bequests and deferred gifts again declined in importance as sources of individual gifts
- Corporate matching gifts provided a record 7.9 percent of total corporate support
- The average alumni gift to the annual fund decreased 1.1 percent to $98.15, but solicitation effectiveness reached a record 18.6 percent

The principal questions a survey such as this attempts to answer are: 1) how much was given – by whom, to whom and for what purpose; and 2) how do these results differ from those reported in previous surveys. A variety of tabulations of the responses to each survey can provide the answers to the first question. Responding to the second is more difficult.

The number and composition of survey participants vary from year to year. Many institutions reply every year, but there are always some dropouts as well as new participants in each survey. The total number of respondents may indeed be the same in two successive surveys, but their characteristics are sufficiently different that straight comparisons are unreliable. The influence of these unknown factors can be eliminated by analyzing changes in support patterns of a "core" group of institutions responding to two consecutive surveys. These changes can in turn serve as benchmarks against which to assess the reports from the larger group.

The following analysis will therefore catalog the reports of voluntary support received in 1980-81 by all of the survey participants, examine support patterns over the last decade from the standpoint of all respondents and examine a core group participating in two successive surveys.

The Recipients

A total of 928 institutions reported in the 1980-81 survey, fewer than the 1,019 reporting in 1979-80. Even so, this smaller number of institutions received $3.318 billion, a $263 million increase over the $3.055 billion received by the larger number of institutions in 1979-80, as is shown in **Table 3**.

Despite the disparity in total respondents in the two surveys, the percentage distribution of support received

Table 3. Voluntary Support by Type of Institution (000 omitted)

Two-Year Institutions	104	20,414	196	64	21,413	335	+70.9	+36.1	41
GRAND TOTAL	1,019	$3,055,052	$ 2,998	928	$3,318,065	$ 3,576	+19.3	+11.4	789

*Figures shown differ slightly from those published in the 1979-80 survey report; four institutions have been reclassified, and the amount of support reported by them in 1979-80 has been allocated to the class in which they reported in 1980-81.
**Includes $105 million nonrecurring transfer. See Table 1.

by the various types of institutions was constant in the two time periods. Seventy-one percent of all contributions went to the private colleges and universities, 28 percent to the four-year public institutions and the remainder to the two-year schools. The proportions reported by each of the various types of private institutions also remained quite stable from one survey to the next. But this type of analysis masks a number of interesting shifts in support patterns.

Any comparison based on only total support dollars received by each type of institution from year to year is misleading, since the number of institutions in each class varies. Using the average support per institution in each class helps correct for this imbalance, but even averages are deceptive, since the colleges in each group differ every year. Comparison of the changes in the averages between the two surveys does, however, provide some insight into changing patterns. Even more meaningful is a comparison of the changes reported by the core institutions – those participating in both surveys.

These two rates of increase are shown in **Table 3**. As can be seen, their patterns are similar, but the changes for the institutional averages are exaggerations of those for the core group. The two change rates are closest in the instances where the number of respondents in both 1979-80 and 1980-81 is almost the same. When there is a wide variation in the number in any group from one year to the next, as with the two-year institutions, or when the number of cases in a group is very small, as with the men's colleges, the variations between the total sample and the core group are the greatest.

Both the women's colleges and the two-year institutions in the core group reported above-average increases from 1979-80 to 1980-81. A look at the details of the institutions' reports shows why.

Support more than doubled at 5 of the women's colleges; 30 reported increases of between 20 and 100 percent; and 12 more posted increases, all of them less than 20 percent. Only 20, therefore, or 30 percent of these 67 core institutions, reported decreases in contributions.

The two-year colleges reported much the same patterns. Twenty-six, or 63 percent, recorded increases, with 8 of them more than doubling their gifts. In fact, one institution reported receiving 65 times as much support in 1980-81 as in 1979-80, because of more than $800,000 in corporate support for physical plant and facilities. A large gift like this has a disproportionate effect when the base is small.

Table 4. Percentage Changes in Voluntary Support by Type of Institution (Core Group)

Type of Institution	1977-78 v. 1976-77	1978-79 v. 1977-78	1979-80 v. 1978-79	1980-81 v. 1979-80	1980-81 v. 1976-77

*Includes $105 million nonrecurring transfer. See Table 1.

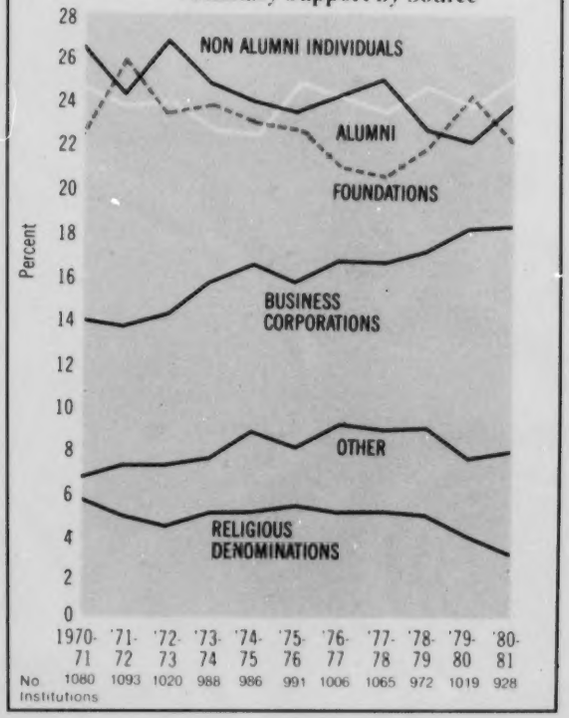
Linking the percentage changes for the core institutions from survey analyses for several years corrects for the different number of core respondents in each year's survey and also provides additional insight into the changes in voluntary support patterns over time. This has been done in **Table 4**. As can be seen, the changes reported by the core institutions between 1979-80 and 1980-81 are fairly consistent with the four-year linkages, especially for the women's and the two-year colleges. There are some differences also, especially with the private universities and the four-year public institutions, demonstrating the erratic nature of some of the annual changes. Indeed, wide swings in the changes for the men's colleges and the professional and specialized schools highlight the need to focus on changes for more than a single period.

The Donors

Between 1970-71 and 1980-81 the various types of donors have accounted for fairly constant shares of total contributions, as can be seen in **Chart 2**. Individuals and foundations together have provided about 70 percent of total voluntary support, corporations from 14 percent several years ago up to the 18 percent in recent years, and the religious denominations and other sources the remaining 12 to 16 percent. The steady growth in importance of corporate contributions and the recent decline in the importance of support from religious denominations are the two significant deviations from the general pattern.

There have also been changes in the dollar amounts of support from various types of donors. **Table 5** presents data about these changes in two ways – changes in

Chart 2. Percentage of Voluntary Support by Source

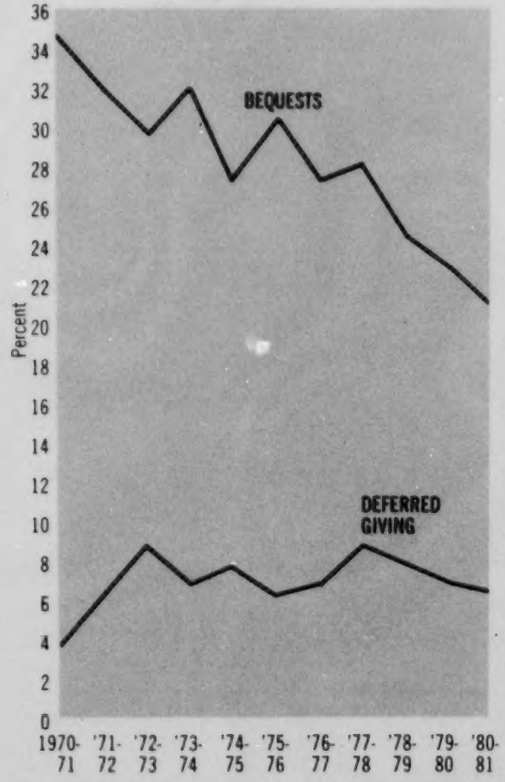


average suport from each of the donor groups as reported by all institutions participating in 1979-80 and in 1980-81, and changes reported by the core group participating in both years. As was seen in **Table 3**, the skewing caused by the different composition of the total samples in 1979-80 and 1980-81 produces similar but exaggerated rates of change vis-à-vis the changes experienced by the core institutions. The overall trends are consistent, but the data for the total sample by themselves do not present a totally accurate picture because of the differences in group makeup.

Special Forms of Giving

There are several specialized mechanisms by which donors may make contributions. Among them are bequests and deferred gifts (e.g., life income contracts),

Chart 3. Bequests and Deferred Giving as a % of Voluntary Support of Individuals



corporate matching-gift programs and the annual fund.

Information about *bequests* and *deferred gifts* and their relative shares of individual gifts as reported in the surveys since 1970-71 are shown in **Chart 3**. Although both are random in character, there has been a definite downward trend in the percentage of bequests during the last decade, especially since 1977-78, while the percentage of deferred gifts has fluctuated within a fairly narrow range.

In particular in 1980-81 the dollar value of bequests rose at the private universities and the women's colleges, but fell at the professional and specialized institutions. The latter was the result of one large bequest in 1979-80 which raised the total bequests for that year. Such "blips" are even more common with deferred gifts, since the total dollar amount of these gifts is very small. An example of this is seen in the ninefold increase in deferred gifts reported by the two-year institutions in 1980-81 over 1979-80. Five institutions received deferred gifts ranging from $25,000 to $50,000 each from nonalumni individuals. Such large amounts of money in a single year produced an extraordinarily large increase over the small dollar amount reported in the previous year, although the rise in dollar amounts was relatively small. Otherwise, the decline in deferred gifts was general across all institutional types except the women's and professional and specialized colleges.

Corporate matching-gift programs have increased in importance as a way for corporations to support colleges and universities. Private institutions receive more than 80 percent of corporate matching gifts, public 18 percent, reflecting the loyalty of alumni in each sector and the private institutions' greater dependence on individual support.

The corporate portion of these gifts was at an all-time high of 7.9 percent of total corporate support for all institutions in 1980-81, a steady rise from the 2.4 percent share in 1967-68. During that period the average corporate match has risen from $82.75 to $204.67. The degree to which corporate support is provided through matching gifts rather than through other mechanisms varies considerably by type of institution. Over the period from 1967-68 to 1980-81, matching gifts have become an increasingly important source of corporate funds at the private men's, women's and coed institutions, providing respectively, 55.1, 26.5 and 17.8 percent of their corporate donations. In contrast, matching gifts accounted for less than 9 percent of corporate funds flowing to all of the other types of institutions.

Table 5. Percentage Changes in Voluntary Support by Source, 1979-80 to 1980-81

Donor	All Institutions Reporting: Average 1979-80	Average 1980-81	% Change in Average	Core Group: % Change

No. Institutions Reporting	1,019	928		789

Despite the decrease in the number of reporting institutions in 1980-81, the number of donors to the *Annual Fund* and the total value of their gifts increased slightly (see **Table 6**). This growth was not enough, however, to prevent the first decrease in the average gift to the annual fund in ten years, which occurred when the highest level of solicitation effectiveness was reached.

During most of the period between 1970-71 and 1980-81 alumni gifts to the annual fund accounted for an increasing share of total alumni support, rising from about 34 percent in the early 1970s to 43 percent in 1978-79. Since then a reversal in the trend has brought them to 38 percent of all alumni support in 1980-81. Total alumni support dollars in that year were 13.2 percent greater than in 1979-80, while alumni gifts to the annual fund rose only 4.2 percent. Alumni are increasingly channeling gifts to their institutions outside the annual fund, although the data on bequests and deferred gifts show that they are not coming through those instruments.

As **Table 7** shows, the decline in the average alumni gift was spread across all but one of the institutional categories. The private coeducational colleges were the exception.

(Continued on page 57)

Technical Notes:

A. In the listing on the following pages, Column 22 does not purport to show the total operating expenditures of the reporting institutions; it excludes the operating costs of dormitories, dining halls, student stores, and other "auxiliary enterprises" as well as all outlays of a capital nature.

B. In some instances the number of institutions listed is greater than the number tabulated, for two reasons: (1) some multicampus institutions are shown in summary as well as in detail and (2) some of the component professional schools of major institutions are also listed separately.

The Purposes

As with the relationships examined in previous sections of this report, the shares of gifts designated for various purposes have remained fairly stable between 1970-71 and 1980-81. See **Chart 4**. Historically, the largest share of funds was given without any restrictions as to use, running between 30 and 34 percent of all gifts. There was a precipitous drop in this proportion in 1980-81, however, confirmed in part by the declines seen in alumni gifts to the annual fund and in bequests, many of which are often unrestricted.

At the other end of the spectrum faculty compensation has always received the smallest share of voluntary support dollars, although there has been a general rise in its importance since 1970-71. The other major purposes have received varying proportions of the total gifts running in the range of about 13 to 20 percent.

Analysis of the amounts contributed for current operations and capital purposes since 1960-61 shows some interesting patterns. Until 1968-69 more money was given annually for capital purposes than for current operations. Since 1969-70 funds for current operations have exceeded those given for capital purposes; both have grown steadily, in parallel fashion, since 1974-75.

The changes in contributions made for all purposes are shown in **Table 8**. As with the previous analyses of these kinds of data, the changes in the average gifts for the total sample of institutions in 1979-80 and in 1980-81 exaggerate the changes for the core institutions but are still consistent with those patterns. Of special interest is the large increase in funds for faculty compensation. A CFAE survey in 1981 found that college presidents considered faculty salaries the most important area for additional funding. The fact that "other" areas – ones not specified in the survey – received the largest increase in funds of all the purposes indicates that new areas for funding – perhaps libraries, for example – are emerging and should be specified in future surveys.

PRIVATE SECONDARY AND ELEMENTARY SCHOOLS

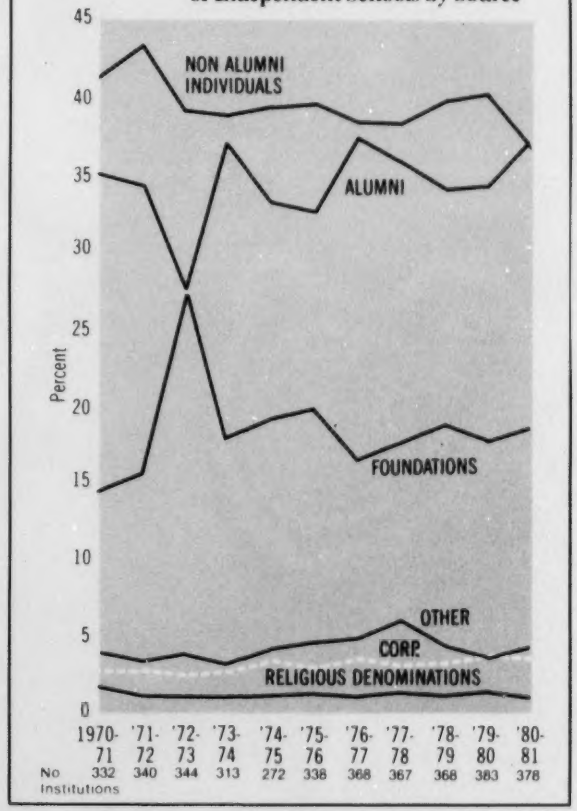
Survey Results

- The 378 schools participating in 1980-81 received $212.0 million. Average support of $560,742 was 16.3 percent greater than the $482,206 average for the 383 schools reporting in 1979-80
- The year-to-year increase in total support for the 292 schools in two surveys was 16.9 percent, well above inflation
- Alumni and foundations increased their contributions by above-average percentages
- Support for faculty compensation increased by 52 percent. Unrestricted funds were up by 20.4 percent

The 378 independent schools participating in the 1980-81 survey reported voluntary support of $211,960,362, versus the $184,684,822 reported by 383 schools in 1979-80. The average $560,742 per school in 1980-81 was 16.3 percent larger than the average of $482,206 for each institution in 1979-80.

A more dependable picture of the rate of change, however, is in the reports from the 292 schools participating in both surveys. This core group reported a quite similar increase of 16.9 percent in total contributions, well above the 11.8 percent inflation rate of 1980-81.

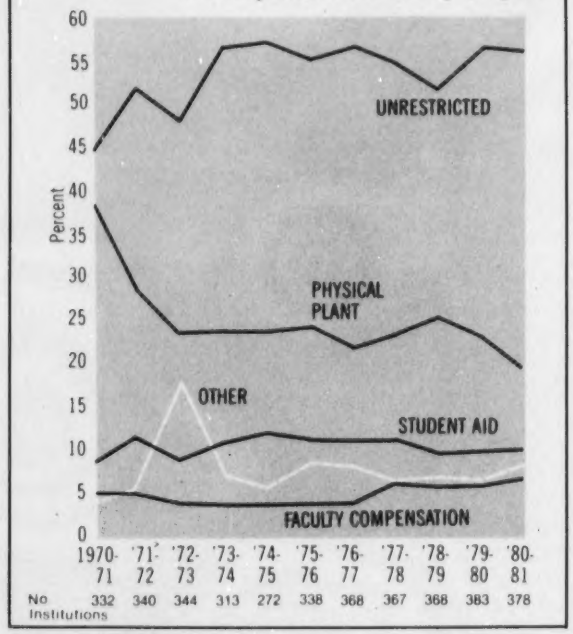
Chart 5. Percentage of Voluntary Support of Independent Schools by Source



This was welcome news to the independent schools, since the growth in support reported by the core group in 1979-80 was lower than that year's inflation.

Historically alumni and nonalumni individuals have accounted for over 70 percent of the private gifts to the independent schools, foundation grants have provided the next largest share of 15-20 percent, and gifts from other sources have made up the rest. These patterns were continued in 1980-81, as is shown in **Chart 5**. The greatest increases reported by the core institutions were from alumni and foundations, which expanded their gifts by 27.4 percent and 21.8 percent respectively. Gifts from nonalumni individuals and corporations both

Chart 6. Percentage of Voluntary Support of Independent Schools by Purpose



grew only slightly—by 5.3 percent and 2.6 percent respectively.

Successful annual fund drives were responsible for some of the growth in alumni contributions. Almost 27 percent of the alumni solicited provided $24,389,336, which was 14.2 percent more than they gave in 1979-80 and constituted almost 31 percent of all alumni contributions. The average gift increased 9.2 percent to a record $114.26. Growth in bequests and deferred gifts also contributed to the rise in support from individuals. Together they grew 25.1 percent over 1979-80 and accounted for 12.0 percent of gifts from all individuals in 1980-81. Corporate matching gifts increased dramatically too, rising by 38.3 percent and setting two records—comprising 44.6 percent of total corporate contributions and 1.4 percent of total voluntary support (see **Table 9**). Over the years corporations have provided a small but growing percentage of the voluntary support of independent schools, although not to

the same degree as to the colleges and universities.

Changes in the purposes for which gifts were made varied considerably, as can be seen in **Chart 6**. Support of faculty compensation and of "other" purposes rose by extraordinary proportions – by 52.0 percent and 40.5 percent respectively – but together they constituted only about 6 percent of total support. Unrestricted funds grew by a healthy 20.4 percent. This was good news, since better than half of the support given to the independent schools over the years has been without restrictions. The only decrease reported was a 10.7 percent drop in funds for physical plant, the second year in a row for this purpose. Grants for capital purposes grew faster than did those for current operations, although the latter were still more than half of all the funds raised.

Note: The year-to-year changes shown in this table are not all of equal significance. The total amount reported by any one class of institution from any one class of donor is subject to erratic behavior due to major fund-raising drives, the timing of corporate and foundation programs, large bequests and other nonrecurring influences. This is particularly true of the smaller groups of institutions and the smaller dollar figures.

*Includes nonrecurring transfer of $105 million from the Emily and Ernest Woodruff Fund, Inc., to Emory University for unrestricted endowment in 1979-80.

126

*In every survey each institution is classified in the category appropriate to its status in that year. Since the status of many institutions has changed over the years, the data by category is not strictly comparable from one survey to another. See page 61 for a comparison of 1979-80 and 1980-81 data on an adjusted basis.

**Includes $105 million nonrecurring transfer. See Appendix Table B.

*Includes approximately $200 million of faculty salary endowment grants from The Ford Foundation.
**Includes $105 million nonrecurring transfer. See Appendix Table B.

Colleges and Universities Reporting the Highest Totals

The 20 Colleges and Universities Reporting the Highest Totals of Voluntary Support:*

Harvard University	$90,968,738
Stanford University	79,462,853
Yale University	58,304,711
Southern California, University of	55,234,810
Cornell University	54,575,318
Minnesota, University of	49,828,866
Pennsylvania, University of	48,930,359
Columbia University	48,444,576
Massachusetts Institute of Technology	47,540,361
Johns Hopkins University	46,849,517
Dartmouth College	42,487,408
Chicago, University of	39,241,134
Duke University	36,713,979
Texas A&M University	35,714,920
Princeton University	35,335,965
Yeshiva University	34,306,665
Illinois, University of	34,283,060
California, University of-Los Angeles	34,080,324
Wisconsin, University of-Madison	33,585,367
Northwestern University	33,092,725

*Not included are two systems, each comprising multiple units.

California, University of (System)	97,770,325
Texas, University of (System)	76,723,422

The 20 Colleges and Universities Reporting the Highest Totals of Corporate Support:*

Arizona, University of	$19,795,655
Massachusetts Institute of Technology	16,190,667
Harvard University	16,136,886
Stanford University	15,459,115
Illinois, University of	15,245,942
Pennsylvania, University of	12,358,169
Michigan, University of	10,409,022
Texas A&M University	9,928,947
Columbia University	9,236,566
California, University of-Berkeley	8,495,214
Georgia, University of	8,365,433
Cornell University	7,547,001
Southern California, University of	7,177,864
Minnesota, University of	7,083,040
Michigan State University	7,025,381
Louisiana State University	7,015,000
California, University of-Los Angeles	6,461,249
Texas, University of-Austin	6,355,165
Ball State University	6,087,217
Wisconsin, University of-Madison	6,079,923

*Not included are two systems, each comprising multiple units.

California, University of (System)	28,401,562
Texas, University of (System)	11,416,072
